

LADBON FRAGARI

SYSTEM DEVELOPER. FRONT-END.

Driven system developer who for the past five years has worked with an array of different tasks. Business systems, system integrations, and games. Ladbbon is powered by high code quality and has a great interest in developing applications according to TDD and with device tests. As a person, he is unpretentious, knowledge-seeking, social and a much-appreciated team member.

HOW I APPROACH MY ASSIGNMENTS

WHY HOW WHEN

Why do we need this.
How will I fix this(inner voice).
When do you need this?
These are all the variables I need to effectively start and finish a task.

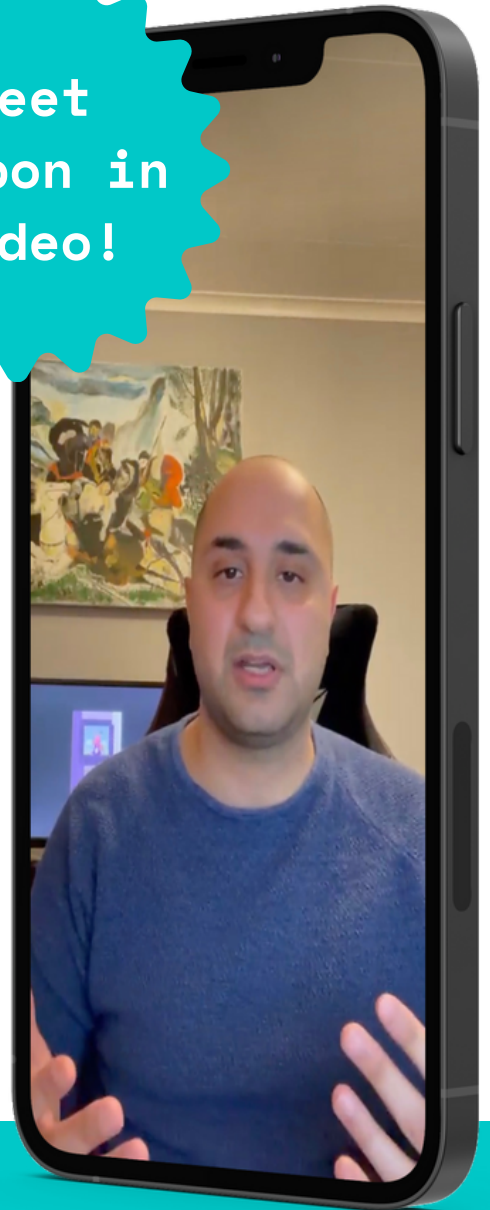

COHESION

Tackling each assignment with the strength of many will lift your self esteem, increase moral, and ultimately increase results. Thats why I enjoy helping colleagues, asking for help, being happy in the every Monday morning.

DOCUMENTATION

Every programmer got their black book of formulas they whip out for each problem they've solved before. Not only am I no different but I enjoy creating and maintaining a knowledge bases, design document for my future replacements. I pride in making the road I took easier for the next person.

Meet
Ladbon in
video!

EQUALTURE

PERSONALITY TRAITS*

*Equalture personality test. Full report presented upon request.

98 TASK PRIORITIZING

Ladbon can successfully and independently assess the demands of his work tasks (such as their importance or urgency, and prioritize his work tasks based on these demands).

86 PROBLEM SOLVING

Ladbon is a critical thinker and can quickly and independently identify and plan the steps that are necessary to take when solving a problem. In addition to quickly planning the steps ahead, he tries to identify and take the least amount of steps possible.

67 INHIBITORY CONTROL

Ladbon can easily work in an environment or job with unexpected situations or distractions, as he can easily replace habitual behavioural responses or impulses with behaviours that will help him achieve a certain goal.

ABOUT SINGULA

Singula is a consulting company in IT, technology and management. The company is started by entrepreneurs with many years of experience in the consulting industry in Sweden. After many years in the industry, we see great potential in creating a consulting company where people are really in focus. Singula will do that by turning everything upside down. If we are to revolutionize the industry, we cannot follow in the footsteps of everyone else.
